V-Tech Complete Class 4 ATL Package

Part Number: VTATL4

The complete V-Tech Class 4 ATL package gives you everything you need in one professionally crafted solution, featuring premium European-made equipment, proven testing ability, full installation, and training, all in a simple package sourced from a single supplier. It's the smart choice for garages aiming to raise standards, improve workflow, and reflect the quality of their business.

- Italian 4 Post 4T ATL Lift - Delivers powerful lifting performance with a 4.0 tonne capacity, giving you the strength and reliability needed for busy Class 4 testing
- Hydraulic Play Detectors - Supports smooth, accurate inspection procedures
- Recessed Turn Plates - Improves usability and helps create a cleaner, more professional test lane layout
- Italian Headlamp Aligner - Compatible with halogen, LED, and Xenon headlights, making it ideal for modern vehicle testing
- British Class 4 ATL Jacking Beam - Provides dependable 2.0 tonne lifting support for effective testing and inspection tasks
- Danish PC based Brake Tester - Delivers dependable Brake testing for cars and vans through a straightforward, efficient PC based system
- Swedish integrated combi gas and smoke Emissions Analyser - Combines Petrol and Diesel testing capability in one system, helping streamline your bay and save space
- Full Ancillary MOT Bay Pack included - comes complete with the essential finishing items needed to get your ATL bay fully equipped and operational
- Delivery, Installation, and training included - gets your new equipment up and running properly, with expert setup and the confidence that your team knows how to use it

Save £4,795 excl VAT on your new Class 4 ATL bay this May!

200L 3HP Piston Compressor - 1ph 230v 20A

Part Number: A18/200

- Industrial duty rated construction - Built to handle regular workshop use with dependable long-term performance
- 200 Litre receiver - Provides greater air storage to support longer tool run times and smoother operation
- 12.0 CFM FAD output - Delivers strong usable airflow for a wide range of workshop applications
- Heavy duty IP55 motor - Gives added protection and durability in demanding working environments
- Auto stop / start control - Helps the compressor operate automatically and more conveniently during daily use
- Low vibration levels - Supports smoother running and a more stable machine in the workshop

The A18 / 200 stands out because it combines a powerful 3 horse-power motor, a large 200 litre receiver, and strong 12.0 CFM FAD performance in a 230V single phase format that suits many workshops. With features such as a heavy duty IP55 motor, auto stop/start, low vibration operation, and a deep finned cast iron cylinder, it is designed to give buyers a practical balance of performance, durability, and everyday usability.

High efficiency air pump helps deliver reliable compressed air performance from every cycle

VGE 5 Tonne Hydraulic 2 Post Lift

Part Number: VGE-T50EX

- 5-tonne lifting capacity (5000 kg), supports large cars, SUVs, vans, and light commercial vehicles. One lift accommodates most workshop vehicles, reducing the need for multiple systems.
- Twin hydraulic cylinders with synchronising cables ensure perfect alignment during rise and descent, providing smooth, stable, level lifting under heavy loads, preventing tilting and increasing safety.
- Triple-stage telescopic arms with adjustable 70 mm pads and optional 100mm extensions. Provides easy access to jacking points for various vehicles and chassis heights.
- Fully electric lowering and lock-release with push-button operation for lifting, lowering, and lock release, enabling a faster, more efficient workflow.
- Comprehensive safety systems include top-limit switches, hose-burst protection, and arm-locking mechanisms. These enhance safety, reduce accidents, and ensure insurance compliance.
- Adjustable pad extensions. Allows multiple lifting heights and better contact with varied vehicle chassis. Enhanced versatility for everything from small cars to commercial vans.
- CE-approved heavy-duty construction with steel columns, reinforced arms, and a premium hydraulic power unit ensures durable, reliable daily operation.

A strong combination of power, flexibility, safety and ease of use
